

DEVELOPMENT CHARTER

01. *ONE THING AT A TIME*

Rather than working on multiple tickets, work on one ticket efficiently.

02. *LEAVE IT BETTER*

Improve and clarify the code whenever you edit it. Tests are code too.

03. *CONNECT & COLLABORATE*

Collaborate with team members from all roles. Share information.

04. *CONTINUOUSLY DEPLOY*

Make every commit knowing it could be deployed to production.

05. *COMMIT EARLY AND OFTEN*

Commit your work frequently and in small pieces, pushing it to the shared repository several times a day.

06. *AUTOMATE*

If you have to perform the same task more than once, this task can be automated.

07. *KEEP THE BUILD GREEN*

No matter who checked in the code, always leave the build in a shippable state.

08. *OWN IT*

Own it all the way to the customer. Be proud and take ownership!
